Applications

- ▶ Airports
- ▶ Sports Arenas
- ▶ Retail Parks
- ▶ Police Stations
- ▶ Critical Infrastructure
- ▶ Government Buildings
- ▶ Conference Centres

PAS68 SECURITY PLANTER (NEW Innovative Low Cost)

The Safetyflex universal slimline planter is the worlds smallest crash rated security planter and is the only slimline planter in the marketplace that is universally designed to be made to any sized required. The planter is designed as surface mounted with a shallow foundation. This system is so shallow it reduces the need to re-divert utilities. This slimline security designed planter can easily fit onto narrow walkways outside banks, train stations, sports stadiums and will not take up large amounts of floor space and is very aesthetically pleasing. One great advantage with this system is the planter is only 100kg in weight so you need no heavy plant to off load or move it into place. The minimum length is 1.48 metre long and the width is 450mm or to whatever the client requires.

'This system is one of the most LOW COST solutions on the market'
